

Recommended Penis Extenders

Our Top Recommended Penis Extenders

#1. SizeGenetics

SizeGenetics is one of the most well known penis extenders on the market. It is known as being the **most comfortable penis extender**, as well as one of the most effective. SizeGenetics was first introduced in 1994 and is a clinically proven, medical type 1 penis enlargement device.

The only drawback of SizeGenetics would have to be the price. However, with an increase in penis size, price shouldn't be much of an object. SizeGenetics is rated 5 stars based on overwhelming feedback. Users report it to be extremely comfortable as well as effective. For some, you can't put a price on comfort, so **if cost isn't an issue for you, we HIGHLY recommend going with SizeGenetics.** This extremely comfortable extender will guarantee results. In fact, They offer a full 6-Month Guarantee if you aren't happy for any reason. Not to mention **it ships WORLDWIDE!**

#2. Vimax Extender

Vimax Extender is our top choice for penis enlargement devices if you're on a budget. Vimax Extender came onto the penis enlargement product scene back in 1994, and is manufactured by the same company as Vimax Pills, so we know it's from a reputable company.

For years the device cost upwards of \$300, but back in 2010 they increased production and **lowered the price to just \$99.95** which is unheard of for a quality penis extender such as this one. The **Vimax Extender** is also endorsed by top doctors, and is clinically proven to increase the

size of your penis.

Users have reported up to a **1.5 inch increase in penis size** within a few months of use, and around a 30% increase in length within 6 months. It is also very effective in correcting curvature of the penis. The thing that really put Vimax Extender over the top for us, was their no questions asked **6 FULL MONTH money back guarantee**. Being as effective as it is (as well as cost effective), we give Vimax Extender our #2 spot. If you're on a tight budget, and still want to see results, this is your best bet, bar none.

#3. ProExtender System

ProExtender System is also a well known penis extender. It has been used by literally tens of thousands of men in dozens of different countries. It too, is known as being one of the most comfortable extenders on the market, and is recommended by doctors.

Studies have shown an increase of 1.1 inches in length (erect penis) after just a few months.

Most users report wearing it, with no problems at all. Some even forget they have it on.

ProExtender System in our opinion is a bit pricey, but on the other hand, it does come with some of the best male enhancement products in the industry to help you along. It comes with both Semenax as well as VigRX Plus.

This is the one thing that really makes ProExtender stand out. They also offer you a full 6 months plus 1 week guarantee, which is great. You get to try it out and ship it back for a full refund if you're not impressed!

#4. Jes Extender

Jes Extender is also a well known penis extender, and has been around for a long time. They recently change the design to be more comfortable than the previous model, which is good, since you will likely be wearing it for a few hours everyday. The Jes extender is priced fair at around \$300 USD.

If you're looking for a solid penis extender without all the extras, it's worth checking out. One small drawback for some people is that it isn't made in America, and most of our readers prefer American made products, but don't let that be your only deciding factor.
